

PUSHING YOUR BUTTONS

Launching at this years Monaco Boat show will be an extensive range of new push button cabinet knobs and pulls. For years yacht designers have been looking for, and asking for, an alternative to the standard round push button knobs that are made in their thousands and used on every production yacht on the ocean.

A super yacht deserves better and the designers need more choice and better quality, which is why after a couple of years research and many custom one-off handles, Turnstyle has decided to produce a range of semi custom push button cabinet pulls.

Using a sturdy, silent, and reliable solid brass latch system available in finishes to match the handles, the push system pushes to release but closes and locks by shutting the cupboard/ drawer. Not only will the designers and owners love the designs, but the crew will love the silent, reliable mechanism.

There will be over a dozen handles to choose from in both leather, composites, Shell inlays and plain modern shapes plated to suit (a selection of leather options shown here).
