Press Release

Shown here in Burnished Brass and Chocolate leather

Textured Metal – Hammered Surface by Turnstyle Designs

July 2016;

Developed after a recent custom commission by a client, Turnstyle Designs have introduced a textured metal option to its metal finishes, called the “Hammered” range.

The technique, as old as the hills, is produced by our skilled craftsmen hammering the surface by hand using specialised planishing hammers, in order to beat the pattern into the metal work. Each piece is totally individual and when finished
combined with Turnstyles many leather, Amalfine and Metal finishes, our clients are able to have a custom handle choice, made to order, by hand in Devon, England.

Available to view at: ICFF 2016, 100% Design, Focus16 and Monaco Yacht Show.

Available to view online: September 2016

Shown here in Grey leather and Polished Nickel metal finish
