Revised push button installation

Revised installation reduces the possible twist between the screws and the handle when mounting thus stopping the button sticking.

- **Sleeves fitted to handle**
- **Cross section showing sleeve mounting**
- **Cross section showing assembled handle**

**Internal M4 threaded sleeves x 15 long**

**M4 x 16mm grub screws**

**Revised cabinet drilling detail, see page 2 for dimensions and template**

**Shorter M4 button head screws**

Push Button Installation – Ledge and Dive

Revised drilling details

Please note:
The height from the top of the door/drawer front to the drilling detail (shown above) is only suitable when the front is flush fitting to the carcass as shown in the diagram.

Please set out handle and latch before drilling.
