***Terms explained:***

**Shagreen** - Shagreen is now commonly made of the skins of sharks and rays. Turnstyle Design’s environmentally friendly version is a cast from the skin of a stingray and reproduced using their Amalfine™ composite.

**Amalfine**™ – Turnstyle Designs own composite blends have become one of our trademarks. The finishes in the Amalfine range are more like materials than finishes, the colour runs throughout the design so unlike a surface finish it cannot wear off.
