**Turnstyle Designs – Blacker than Black**

Turnstyle Designs have developed a beautiful and very contemporary new plated finish, Matt Black Chrome. A series of closely guarded processes produce an incredibly solid, deep, matt black finish that is now available on all Turnstyles brass parts and it is made to order.

Black finishing has grown and grown in popularity across many products in the design industry, from faucets to lighting and by popular demand from clients Turnstyle have now introduced the finish to all their collections. The finish is incredibly durable, suitable for interior or exterior applications on door levers and cabinet handles.

**Home spa experiences, by BAGNOSPA**

With the top trend for 2018 reported to be creating at home spa experiences, the BAGNOSPA range offers many modern, modular designs to create an at home haven. Whether it be creating a personalised combination of chromatherapy or hydrotherapy discs with mist, rain, waterfall and rain settings, or opting for the recessed, fully lit shower head complete with dimmable range of 60 colours of light, the BAGNOSPA range offers a solution for every at home spa.

Covering all price points within the market, BAGNODESIGN have also launched a the sister brand, Aqueaceo. Already a huge success in the Middle East, Aqueaceo extends the brassware offering with commercial ranges of mixers, showers and accessories. An excellent solution for many projects which include up to a ten year guarantee, infrared mixers and price competitive products throughout.

**Virtual Worlds launches one price**

Virtual Worlds is ensuring the price is right with its pricing product for the KBB Industry, Virtual Worlds One Price.

One Price has been developed to save time and increase efficiency for KBB retailers by making it easy to create designs and see the related price or quote, without needing to input the data into a second piece of software.

Extending beyond just the design of a product, Virtual Worlds One Price allows showrooms to instantly produce quotes, pro-forma invoices and purchase orders using simple, customisable templates. Retailers can manage them from any device, wherever they are, through the cloud.

Virtual Worlds’ unique cataloguing convention means that individual parts of a single item can be amended and automatically dealt with, ensuring the quote remains accurate, even when the item being specified is altered.

With a wide range of products available through Virtual Worlds expansive catalogues, customers can fully assess the options available to see which one suits them both aesthetically and financially before they commit to a project. For more information please visit the website.

**KWC’s precision-crafted ERA sink and tap range**

With craftsmanship that perfectly combines form and function, KWC’s new ERA range of three sinks and four taps is aimed squarely at consumers who demand nothing less than absolute high-end design.

Available now, ERA sinks are very minimalistic in design with sleek proportions and a high precision look, featuring an ultra-thin 4.5mm rim which offers a unique ‘in-top’ installation method, an innovative invisible ghost overflow and bevelled square waste cover.

The rim is highly polished to provide a glossy finish that contrasts with the bowl and this refined design detail is reflected in the soap dispenser and push-button pop-up waste.

Elegant ERA accessories include a teak and stainless steel strainer bowl, a solid teak chopping board and Rollamat for optimum functionality.

Complementing the sinks are four taps styles in a J-spout, Gravity spout, L-spout and Pull-down spray with separate lever mixers. The taps have the smallest spout diameter currently on the market.
