

FIDDLE RAILS

Fiddle rail fittings, essentially, keep everything in place and stop items from falling off shelves, bars, side tables and are mostly used at Turnstyle within the Marine industry.

These fittings are the ironmongery hardware you might not think you need, but do. Designed to ensure your items are kept in place and secure during any occurrence. The elegant and long designs can be adapted to suit any interior need. Many of our fiddle rail orders are bespoke and made to order from our factory in North Devon, England.

Then shipped out to be fitted on beautiful masterpieces within the marine industry. Much like our other ranges, fiddle rails are available in all finish options which a choice of designs.
