

HICKORY

DOOR LEVERS AND CABINET PULLS

Designed by Christina Roberts and originally inspired by the knife handle designs of the early 20th century.

The American and Canadian hunting knives, often referred to as "Old Hickory", were a much loved tool for the simple reason they felt good in the hand and were consequently very effective.

Christina felt that naturally these were perfect to transform into door hardware.

Produced in Turnstyle's trademark Amalfine material, the Hickory design is available as a door lever or cabinet D Handle in over 48 combinations of Amalfine and Brass Finishes. This includes the addition of the "Sand" finish which previously has only been available in our Shagreen designs

D-handles in over 48 combinations of Amalfine™ and brass finishes. There is also the addition of the sand finish, which as only previously been used with Shagreen designs.
