‘Form follows function - that has been misunderstood. Form and function should be as one, joined in a spiritual union.’

Frank Lloyd Wright
Turnstyle Designs was founded in 1992 by Steve Roberts. The company, family owned and run, is now one of the region’s largest employers and operates out of its own purpose-built factory in Barnstaple. Employing a wealth of talent from craftsmen, engineers and an excellent sales team, who all take great pride in producing and delivering some of the world’s finest door and cabinet hardware.

Turnstyle produce a broad palette of products, using a wide choice of materials including hand-stitched leather, machined and hammered brassware, as well as its own composite called Amalfine®. Turnstyle also use a range of custom materials including glass, shell and timber.

Turnstyle is proud to have supplied luxury hardware to many prestigious projects over the years, including luxury yachts, private residences, hotels and private clubs. From the eight stitches per inch to the cotton sleeve every handle is delivered in, attention to detail runs through the veins of the company in every aspect of business. The pride in producing each product is evident in its quality of design and service.

As proud winners of The Queen’s Award for Export, Turnstyle export over 75% of its business to dealer partners in over 30 countries around the world.

About us
Sustainability is a part of the Turnstyle DNA and we strive to be continually responsible with the materials we use, how we deal with waste and reducing our carbon footprint.

We have removed 99% of single use plastics from our packaging and replaced them with fast and completely biodegradable alternatives. We operate from a highly insulated factory and offices, using our own solar energy source. We recycle everything where possible, including canteen waste.

Even our materials are environmentally conscious, such as our leather which is tanned with natural vegetable dyes sourced from Italy. Our trademark Amalfine™ material is also made up of a composite blend, which includes by-products such as marble dust. Best of all we make our handles to last, strongly believing that if you buy well there is only a need to buy once.

We are working hard with all our staff to cut down air-travel, and endeavour to replace as many face to face meetings as we can with online sales and training sessions. Our ‘Bike to Work’ incentive scheme offers team members the opportunity to reduce their carbon emissions, while keeping fit and all our in-house food ordering is organic and locally produced.

With donations for tree preservation and planting, we have offset our carbon footprint three-fold, making us carbon negative. As proud members of ‘1% for the planet’, we donate 1% or more of our annual turnover to environmental causes and organisations.
Living finishes
Living finishes are designed to change with time and use. Our brass components are polished and then treated using a number of different processes to change the surface, either by accelerated aging as with the Vintage and Burnished finishes or brushing as with our Satin Brass.

Hammered Living
Polished Brass (PU)
Solid brass, expertly polished to a high sheen, pure and simple with nothing added to alter the natural aging process or keep it polished with any good brass cleaning products. LV-EXT

Polished Nickel (PN)
Solid brass, polished, then hammered and polished to maintain our most durable finish. LV-EXT

Burnished Brass (BH)
For our hammered finishes we use a more gentle technique to patina. Each piece is hand burnished to break the surface before being polished, then subtly distressed. LV-EXT

Burnished Nickel (NH)
Polished solid brass, individually hammered, then nickel plated before hand burnished, patinated and distressed to be finished with a wax finish. LV-INT

Brass Plated
Bright Chrome (BC)
Solid brass hand polished then individually hammered, before plated with a crisp and bright chrome plating. Highly reflective hammer blow texture that is easy to maintain and our most durable finish. PL-EXT

Polished Nickel (PN)
Solid brass, polished, heated and re-polished before being finished with our beautifully subtle nickel plating. Superb in contemporary or traditional interiors. LV-INT

Polished Nickel (SN)
Solid brass, polished, heated and re-polished before being finished with a robust nickel plating. LV-EXT

Bright Chrome (BC)
Solid brass, polished, heated and re-polished before being finished with a crisp and bright chrome plating. Highly reflective hammer blow texture that is easy to maintain and our most durable finish. PL-INT

Satin Nickel (SN)
Solid brass, polished, heated and re-polished before being finished with a robust nickel plating. LV-INT

Satin Nickel (SN)
Solid brass, polished, heated and re-polished before being finished with a robust nickel plating. LV-EXT

Satin Brass (TW)
Hand polished, then wire brushed for a golden finish. Wax coated. This finish will darken with age unless kept polished. LV-INT

Satin Black Chrome (CB)
Our latest addition to our plated finishes, a four step process developed by our highly skilled team of finishers, this is a completely matt black plated finish. Highly durable and practical for interior or exterior use. PL-INT

Hammered Plated
Bright Chrome (BC)
Solid brass, hand polished then individually hammered, before plated with a crisp and bright chrome plating. Highly reflective hammer blow texture that is easy to maintain and our most durable finish. PL-EXT

Polished Nickel (PN)
Solid brass, polished, heated and re-polished before being finished with our beautifully subtle nickel plating. Superb in contemporary or traditional interiors. LV-INT

Satin Nickel (SN)
Solid brass, polished, heated and re-polished before being finished with a robust nickel plating. LV-INT

Satin Nickel (SN)
Solid brass, polished, heated and re-polished before being finished with a robust nickel plating. LV-EXT

Bright Chrome (BC)
Solid brass, polished, heated and re-polished before being finished with a crisp and bright chrome plating. Highly reflective hammer blow texture that is easy to maintain and our most durable finish. PL-INT

Satin Nickel (SN)
Solid brass, polished, heated and re-polished before being finished with a robust nickel plating. LV-INT

Satin Nickel (SN)
Solid brass, polished, heated and re-polished before being finished with a robust nickel plating. LV-EXT

Cocoa (CO)
Dyed marble composite, plain designs reminiscent of mid-century Bakelite. Amalfine™ finishes are also extremely durable and maintenance free. Each design and pattern translates differently according to the finish, so please note Amalfine™ designs are recommended for interior use only.

Black Bronze (BB)
Dyed marble mixed with real bronze, highly polished to bring out the bronze highlights, a rich black that will go well in any interior. Amalfine™ finishes are also extremely durable and maintenance free. Each design and pattern translates differently according to the finish, so please note Amalfine™ designs are recommended for interior use only.

Silver Bronze (SB)
Heavily loaded cold cast bronze, highly polished and waxed to produce a rich dark golden finish. Amalfine™ finishes are also extremely durable and maintenance free. Each design and pattern translates differently according to the finish, so please note Amalfine™ designs are recommended for interior use only.

Wooden Leather
Leather finishes are designed to change over time. Turnstyle Designs own proprietary composite blend of materials has been made to last more than 20 years, for longer than any of our competitors. Perfecting the process, all our handles are bonded and hand stitched using only the finest top grain, vegetable tanned leather.

Chestnut (CN)
A rich dark brown, full of life and finished with a natural thread. Turnstyle Designs own proprietary composite blend of materials has been made to last more than 20 years, for longer than any of our competitors. Perfecting the process, all our handles are bonded and hand stitched using only the finest top grain, vegetable tanned leather.

Chocolate (CT)
A rich dark brown, our most popular colour, finished with a dark brown thread. Turnstyle Designs own proprietary composite blend of materials has been made to last more than 20 years, for longer than any of our competitors. Perfecting the process, all our handles are bonded and hand stitched using only the finest top grain, vegetable tanned leather.

Black (BL)
Light brown, leather edges with a soft, natural thread. Turnstyle Designs own proprietary composite blend of materials has been made to last more than 20 years, for longer than any of our competitors. Perfecting the process, all our handles are bonded and hand stitched using only the finest top grain, vegetable tanned leather.

Tan (TA)
Light brown, leather edge with a soft, natural thread. Turnstyle Designs own proprietary composite blend of materials has been made to last more than 20 years, for longer than any of our competitors. Perfecting the process, all our handles are bonded and hand stitched using only the finest top grain, vegetable tanned leather.

Slate (GC)
A mottled grey showcasing in popularly, great with our silver plated finishes and edged with a silver grey thread. Turnstyle Designs own proprietary composite blend of materials has been made to last more than 20 years, for longer than any of our competitors. Perfecting the process, all our handles are bonded and hand stitched using only the finest top grain, vegetable tanned leather.

White (BW)
White, leather edge, white thread, white edging for a clean and contemporary look. Turnstyle Designs own proprietary composite blend of materials has been made to last more than 20 years, for longer than any of our competitors. Perfecting the process, all our handles are bonded and hand stitched using only the finest top grain, vegetable tanned leather.

code: LV = living finish; INT = interior use only; EXT = interior or exterior use; PL = plated finish

Leather
Leather finishes are designed to change with age. According to the situation, exposure to sunlight and usage (or lack of). The more you use it, the better it looks, the oils from your hands feed the leather and create a unique patina. Leather handles should only be used internally. Please see our leather care instructions for maintenance and cleaning.

Colour Variation
Vegetable tanning is an art, rather than a science, please allow for slight variations in colour from batch to batch, this is all part of the charm of using such a beautiful and natural material.
We are proud to have one of the most progressive websites in our industry, with a simple to use configuration tool which allows you to view every one of our designs in every combination of grip and body, leather, Amalfine® and brass.

Choose your design, finish and size, download the specification sheet and then request your pricing. Our sales team will then send you a quote and tell you how to buy.

You can also keep up to date on our latest news, developments, events and dealerships, as well as read our blog where you will find interesting posts about what we are up to as a business and team.

www.turnstyledesigns.com
All door levers are available with a choice of three back plates, configured lever up or lever down (for the USA). Please specify keyhole profile and centre or thumb turn and centre size when ordering. All levers are available in mixed pairs (by finish and design) please specify handing when ordering. Back plates are cast from solid brass and available in all finishes.

Shown here in Alupewt with Satin Nickel.

All of our European roses (apart from the Flat and Classic Rose) are sprung loaded, through bolted, (horizontal or vertical) for extra security and fixing, levers are attached to roses and supplied with 8mm piercing spindles.

Levers on roses are configured for use on a 45mm thick door. Please specify for thicker doors, kits available for doors up to 100mm door thickness.

Shown here in Alupewt with Satin Nickel.

*Privacy function also available on 52mm scalloped rose, 58mm round rose and US pre bore roses.

For full technical specifications contact our sales department or visit www.turnstyledesigns.com
Amalfine™ manufacturing

Amalfine™ is a composite blend which has become one of our trademarks and is entirely unique to Turnstyle. Incredibly versatile and durable, each piece is hand cast, finished and will pass through at least eight pairs of hands before finally being packed for dispatch. Every piece is unique with its own individually crafted character and charm.

The finishes in the Amalfine™ range are more like materials than finishes, the colour runs throughout the design so unlike a surface finish it cannot wear off.

Using highly flexible silicone rubber moulds we are able to reproduce finger print detail from the masters we cast from and de-mould the parts without a seam.

After de-moulding, each design is carefully machined down to remove excess material and where applicable to accurately fit its brass partner.

After around six to eight hours of various polishing stages the beautiful lustre will remain for many years to come.

Every piece is unique with its own individually crafted character and charm.

Turnstyle also offer a Custom Casting and finishing service. For better understanding of the process visit our website and view the production movies www.turnstyledesigns.com

A large, bold design with a heavily grooved grip, creating a tactile feel, much like grabbing the handle of a motor bike. The Norton grip is set on our new Pipe lever shaft and comes in four different Amalfine™ finishes, as well as Solid Brass. Detailed with complimentary classically lined caps and collars, this strong design makes the perfect statement piece.

Shown here in four of our Amalfine™ finishes with Vintage Patina.
combination Amalfine™ door levers

Eight distinctly different door lever grips, hand cast in our trademark Amalfine™ composites. Tactile as well as durable, our Amalfine™ materials are not finishes but solid blends of metals and marbles, each polished for hours to produce a beautifully subtle sheen.

Shown here in Alupewt with Bright Chrome.

The Hickory lever was inspired by the North American hunting knives, often referred to as “Old Hickory”. A simple Amalfine™ flat moulded grip finished with a stud fixing and set on a clean, unsprung, flat rose. A new twist on a door lever and a great choice for anyone looking for something original to add that finishing touch. Shown here in our five Amalfine™ finishes with polished brass.
Turnstyle uses a host of manufacturing processes to produce the very best result for each design and product. These include CNC machining, turning, milling, forging, investment casting and extrusion. All carried out by highly skilled precision engineers.

A selection of our Solid designs are available with our hammered texture applied. Every design is individually hammered with up to a thousand hammer blows per grip, each handle is made to order and completely unique. Whatever finish you wish to apply, our Hammered range is a luxurious option and versatile enough to work in any interior.
solid hammer door levers

It takes a lot of skill and many hours of hard work to produce our hammered door handles. Hand polished, then individually hammered before being hand burnished, patinated and waxed for a more vintage finish with a contemporary look. Functional artwork engineered to last.

Shown here in Burnished Nickel.

Two new additions to our Solid door levers, The Norton and Bonneville, both inspired by British biking classics, reassuringly robust.

Shown here in our ever popular Satin Nickel.
Our leather is sourced from some of the finest tanneries in the world in Tuscany, Italy. We use only the very best full grained (top and strongest section), vegetable tanned (all natural), drum dyed, bridle or saddle leather.

Leather like all natural materials will change with age, according to the situation, exposure to sunlight and usage or lack of. The more you use it, the better it looks, the oils from your hands feed the leather and create a unique patina. Like an old handbag or briefcase the character of the leather gets richer with age.

**Colour Variation**

Vegetable tanning is an art rather than a science, please allow for some variations in colour from batch to batch and even from hide to hide in some cases. This is all part of the charm of using such a beautiful and natural material.

**Wear and Care**

As with a good handbag or pair of shoes the leather will appreciate being fed from time to time, we recommend twice a year with a good quality leather cream, or we can supply a recommended cream if you wish.

Do not clean with solvents or chemicals, as this will not only affect the leather but also soak through and destroy the glue. Scratches and dents can be removed by a simple “boning” process that brings the oils back to the surface and repairs by simply working the leather area in circular motions with a boning tool (or the back of a spoon).

If the leather gets dirty use a small amount of soapy water, let it dry and finish with a natural wax. Try and remove dust if the handles are not being used, as dust dries out the leather.

With a small amount of care your handles will last for years and years to come.
Contemporary square profile with edges hand polished for a softer grip. Solid brass with hand stitched and bonded Italian leather grips, stitch in or out – you choose. Shown here in Black Leather with Polished Brass.

Machined brassware with standard 19mm grips or 22mm Large Barrel for larger doors or hands. Available in all our beautiful leather finishes combined with our diverse choice of metal finishes. Shown here in Black Leather with Polished Brass.

For a complete look to any interior, make sure you take a look at our Furniture Brochure. Where you will find many more of our products and collections to suit any design style.
We offer modification and customisation options for clients by using existing stock components.

A cost effective way to enable a client to have a unique, bespoke design by using some of Turnstyles’ stocked components and modifying material, grips or finish and thereby benefiting from both price and delivery times.

There are several ways of achieving this... here are the main areas:

**Custom Leather**
Clients can free issue their leather to apply to an existing design, or modify our stitch colour or style.

**Custom Grip**
Create your own grip for any of our hardware, and choose your own materials and lengths.

**Custom Metal**
Alongside our standard metals we have a range of custom finish options including Rose Gold, Vintage Copper and Silver Plate.

If you are not able to find something to suit your project in either of our catalogue ranges or via the Modify process we will be happy to discuss developing and manufacturing your vision from start to finish.

We have the capabilities and know-how to manufacture most types of door hardware, however complex, and have been the manufacturer of choice for some of the most prestigious and demanding clients in the world, including a number of Superyacht builders.

We understand the demands put on door and cabinet hardware and will ensure that your design not only looks a million dollars but it is also built to last and function smoothly.

In the first instance please contact our custom design department at our head office and ask for Alex Foster on + 44 (0)1271 325 325 or email alex@turnstyledesigns.com. Alex will discuss the project, designs and suitability (to develop time scales and budget indications) from prototyping to full delivery.
