‘The details are not the details, they make the design.’

Charles Eames
Turnstyle Designs was founded in 1992 by Steve Roberts. The company, family owned and run, is now one of the region’s largest employers and operates out of its own purpose-built factory in Barnstaple. Employing a wealth of talent from craftsmen, engineers and an excellent sales team, who all take great pride in producing and delivering some of the world’s finest door and cabinet hardware.

Turnstyle produce a broad palette of products, using a wide choice of materials including hand stitched leather, machined and hammered brass ware, as well as its own composite called Amalfine™. Turnstyle also use a range of custom materials including glass, shell and timber.

Turnstyle is proud to have supplied luxury hardware to many prestigious projects over the years, including luxury yachts, private residences, hotels and private clubs. From the eight stitches per inch to the cotton sleeve every handle is delivered in, attention to detail runs through the veins of the company in every aspect of business. The pride in producing each product is evident in its quality of design and service.

As proud winners of The Queens Award for Export, Turnstyle export over 75% of its business to dealer partners in over 30 countries around the world.
Sustainability is a part of the Turnstyle DNA and we strive to be continually responsible with the materials we use, how we deal with waste and reducing our carbon footprint.

We have removed 99% of single use plastics from our packaging and replaced them with fast and completely biodegradable alternatives. We operate from a highly insulated factory and offices, using our own solar energy source. We recycle everything where possible, including canteen waste.

Even our materials are environmentally conscious, such as our leather which is tanned with natural vegetable dyes sourced from Italy. Our trademark Amalfine™ material is also made up of a composite blend, which includes by-products such as marble dust. Best of all we make our handles to last, strongly believing that if you buy well there is only a need to buy once.

We are working hard with all our staff to cut down air-travel, and endeavour to replace as many face to face meetings as we can with online sales and training sessions. Our ‘Bike to Work’ incentive scheme offers team members the opportunity to reduce their carbon emissions, while keeping fit and all our in-house food ordering is organic and locally produced.

With donations for tree preservation and planting, we have offset our carbon footprint three-fold, making us carbon negative. As proud members of ‘1% for the Planet’, we donate 1% or more of our annual turnover to environmental causes and organisations.
Living finishes
Living finishes are designed to change with time and use. Brass components which are polished and then treated using a number of different techniques to change the surface, either by accelerating aging as with the Vintage and Burnished finishes or brushing as with our Satin Brass.

Brass Living
Polished Brass (PU)
Solid brass, expertly polished to a high shine, pure and simple with nothing added to allow the natural aging process or keep it polished with any good brass cleaning products. **LV-EXT**

Vintage Patina (VP)
Hand polished brass base, matt treatment before polished to a rich dark brown, lightly distressed for highlights. Finished with a durable wax coating. **LV-EXT**

Fine Antique Brass (FA)
Hand polished brass, lightly patinated and brushed to highlight and contrast. Finished with a durable wax coating. **LV-EXT**

Satin Brass (TW)
Hand polished, then wax brushed for a golden finish. **LV-INT**

Vintage Nickel (VN)
Nickel plated brass, skillfully patinated by our team of craftsmen, followed by hand distressing and wax polishing. **LV-INT**

Hammered Living
Polished Brass (PU)
Solid brass, expertly polished, then hammered and polished a second time to a high shine, with subtle light refraction. Nothing added to allow the natural aging process or keep it polished with any good brass cleaning products. **LV-EXT**

Burnished Brass (BH)
For our hammered finishes we use a more gentle technique to patina, each piece is hand burnished to break the surface before being patinated, then subtly distressed, hand polished and waxed to give a luxurious antique finish, highlighting every hammer blow perfectly. **LV-EXT**

Burnished Nickel (NH)
Polished solid brass, individually hammered, then nickel plated before being hand burnished, patinated and distressed to be finished with a wax finish. Eight pairs of hands before assembly, QA and packing. **LV-INT**

Brass Plated
Bright Chrome (BC)
Solid brass, hand polished then individually hammered, before plated with a crisp and bright chrome plating. Highly reflective hammer blow texture that is easy to maintain and our most durable finish. **PL-EXT**

Polished Nickel (PN)
Solid brass base finished with our beautifully subtle nickel plating, silver with hints of yellow. **LV-INT**

Satin Nickel (SN)
Solid brass, polished, individually hammer finished and re polished before being finished with our beautifully subtle nickel plating. Superb in contemporary or traditional interiors. Clean with any quality nickel polish. **LV-INT**

Malt Block Chrome (CB)
Our latest addition to our plated finishes, a four step process developed by our highly skilled team of finishers, this is a completely matt black plated finish. Highly durable and practical for interior or exterior use. **PL-INT**

Amalfine™
Turnstyle Designs own proprietary composite blend of materials has been perfected over the past 28 years. Each finish is made up of its own unique blend of materials that run throughout the handle. Every piece is hand cast and hand machined before being finished in 2-3 separate processes that can take up to four hours to produce the perfect finish.

Leather
Turnstyle Designs have been making leather door and cabinet hardware for more than 20 years, far longer than any of our imitators. Perfecting the process, all our handles are bonded and hand stitched using only the finest tallow, vegetable tanned bridal leather.

Chestnut (CN)
A rich dark brown, full of life and finished with a natural thread.

Chocolate (CT)
A rich dark brown, our most popular colour, finished with a dark brown thread.

Black (BL)
A beautiful, subtle sheen, classic leather, finished with a black thread.

Tan (TA)
Light brown leather, edged with a soft, natural thread.

Slake (GC)
A rich, tobacco brown, ideal for adding a touch of character and charm. Finished with a silver plated finish and edged with a silver grey thread.

White (BW)
White leather, white thread, white edging for a clean and contemporary look.

Woven Leather
Four classic finishes made from seamless cross weave leather, supplied by a small Italian specialist that has perfected the art of weaving flat strands of leather into totally seamless tubes. Bonded onto specially produced recessed brass work to retain and preserve the cut ends.

Tobacco (TC)
A rich brown leather in a diagonal pattern, finished with a contrasting black thread.

Fiery Red (FR)
A deep red leather, somewhat reflective black sheen, that comes alive as it catches light.

Silver (SV)
A rich, tobacco brown, ideal for adding a touch of character and charm. Finished with a silver plated finish and edged with a silver grey thread.

White (BW)
White leather, white thread, white edging for a clean and contemporary look.

Colour Variation
Vegetable tanning is an art and there is a science, please allow for slight variations in colour from batch to batch, this is all part of the charm of using such a beautiful and natural material.

Please note Amalfine™ designs are recommended for interior use only.

Amalfine™ finishes are also extremely durable and maintenance free. Each design and pattern translates differently according to the finish, see our website to view all designs in all finishes.

Sand (SA)
Only available with specific designs such as Shagreen, Labyrinth, Hickory and Bullet.

Bone (BN)
Made to order only, and only applicable to non textured designs.

Finishes
Amalfine™
Cocoa (CO)
A rich dark brown, black thread, with a classic, plain design reminiscent of mid-century Bakelite.

Black Bronze (BB)
A rich dark brown, lightly polished to bring out the bronze highlights, a rich black that will go well in any interior.

Silver Bronze (SB)
A silvery sheen bronze, highly polished and waxed to produce a rich dark gold finish.

Alupewt (AP)
A secret blend of composite metals, polished and dyed to bring out the highlights in the more detailed designs such as Shagreen.

Leather
Chesnut (CN)
A rich dark brown, full of life and finished with a natural thread.

Chocolate (CT)
A rich dark brown, our most popular colour, finished with a dark brown thread.

Black (BL)
A beautiful, subtle sheen, classic leather, finished with a black thread.

Tan (TA)
Light brown leather, edged with a soft, natural thread.

Bond (BN)
Made to order only, and only applicable to non textured designs.

Whisky (WK)
A light tan mix with dark edging.

Tobacco (TC)
A rich brown leather in a diagonal pattern, finished with a contrasting black thread.

Fiery Red (FR)
A deep red leather, somewhat reflective black sheen, that comes alive as it catches light.

Silver (SV)
A rich, tobacco brown, ideal for adding a touch of character and charm. Finished with a silver plated finish and edged with a silver grey thread.

White (BW)
White leather, white thread, white edging for a clean and contemporary look.

Leather like all natural materials will change with age, according to the situation, exposure to sunlight and usage (or lack of). The more you use it, the better it looks, the oils from your hands feed the leather and create a unique patina. Leather handles should only be used internally. Please see our leather care instructions for maintenance and cleaning.
We are proud to have one of the most progressive websites in our industry, with a simple to use configuration tool which allows you to view every one of our designs in every combination of grip and body, leather, Amalfine™ and brass.

Choose your design, finish and size, download the specification sheet and then request your pricing. Our sales team will then send you a quote and tell you how to buy.

You can also keep up to date on our latest news, developments, events and dealerships, as well as read our blog where you will find interesting posts about what we are up to as a business and team.

www.turnstyledesigns.com
Amalfine™ manufacturing

Amalfine™ is a composite blend which has become one of our trademarks and is entirely unique to Turnstyle.

Incredibly versatile and durable, each piece is hand cast, finished and will pass through at least eight pairs of hands before finally being packed for dispatch. Every piece is unique with its own individually crafted character and charm.

The finishes in the Amalfine™ range are more like materials than finishes, the colour runs throughout the design so unlike a surface finish it cannot wear off.

Using highly flexible silicone rubber moulds we are able to reproduce finger print detail from the masters we cast from and de-mould the parts without a seam.

After de-moulding, each design is carefully machined down to remove excess material and where applicable to accurately fit its brass partner.

After around six to eight hours of various polishing stages the beautiful lustre will remain for many years to come.

Every piece is unique with its own individually crafted character and charm.

Turnstyle also offer a Custom Casting and finishing service. For better understanding of the process visit our website and view the production movies www.turnstyledesigns.com
goose neck combination Amalfine™ D Handles

Hand cast Amalfine™ grips in seven diverse designs, available in five different Amalfine™ finishes with our nine beautiful metal finishes. These D handles can be made with single or double grips and co-ordinate with matching door levers and pull designs.

Our leather is sourced from some of the finest tanneries in the world in Tuscany, Italy. We use only the very best full grained (top and strongest section), vegetable tanned (all natural), drum dyed, bridle or saddle leather.

Leather like all natural materials will change with age, according to the situation, exposure to sunlight and usage or lack of. The more you use it, the better it looks, the oils from your hands feed the leather and create a unique patina. Like an old handbag or briefcase the character of the leather gets richer with age.

Colour Variation

Vegetable tanning is an art rather than a science, please allow for some variations in colour from batch to batch and even from hide to hide in some cases. This is all part of the charm of using such a beautiful and natural material.

Wear and Care

As with a good handbag or pair of shoes the leather will appreciate being fed from time to time, we recommend twice a year with a good quality leather cream, or we can supply a recommended cream if you wish.

Do not clean with solvents or chemicals, as this will not only affect the leather but also soak through and destroy the glue. Scratches and dents can be removed by a simple “boning” process that brings the oils back to the surface and repairs by simply working the leather area in circular motions with a boning tool (or the back of a spoon).

If the leather gets dirty use a small amount of soapy water, let it dry and finish with a natural wax. Try and remove dust if the handles are not being used, as dust dries out the leather.

With a small amount of care your handles will last for years and years to come.

square strap cabinet handles

Our 4mm thick straps come with either a stitched or plain leather finish. They are fitted with engendered square ends and pinned to prevent them from moving. Its the detail that counts.

Shown here in Slate Grey Leather with Satin Nickel.

button strap cabinet handles

Thick vegetable tanned leather inked, bevelled and polished edges, which are fixed with a simple button covered screw. Inexpensive luxury which will compliment your furniture.

Shown here in Slate Grey Leather with Satin Nickel.

latching handles

More options for latching handles. Simple, ingenious ways of keeping your cabinets shut, lift the leather handle to release the catch and pull open or push the button to open. Not just for yachts, they are a better way to keep cupboards shut, smarter than magnetic or friction catches.

Shown here in Chestnut Leather and Bright Chrome.

Lift Latches

Square (stitched) H2009

Square (plain) H6000

Coffin leg Scroll (stitched) R7570

Coffin leg Scroll (plain) R6500

Square Strap (stitched) U1440

Square Strap (plain) UP1440

Square Loop (stitched) U1200

Square Loop (plain) UP1200

Recess Leather Ledge R1989

Solid Ledge S1989

Hammered Ledge HS1989

Latch options

Sprung Latch and Stop/Keep

Solid brass, with brass stop/keep. Simple to fit, durable, quiet and reliable. Operates by pushing to release, automatically latches on closing.

Dimensions index p96. For full technical specifications contact our sales department or visit www.turnstyledesigns.com
For a complete look to any interior, make sure you take a look at our Door Hardware Brochure. Where you will find many more of our products and collections to suit any design style.
customisation

Modify
We offer modification and customisation options for clients by using existing stock components.

A cost effective way to enable a client to have a unique, bespoke design by using some of Turnstiles’ stocked components and modifying material, grips or finish and thereby benefiting from both price and delivery times.

There are several ways of achieving this... here are the main areas:

Custom Leather
Clients can free issue their leather to apply to an existing design or modify our stitch colour or style.

Custom Grip
Create your own grip for any of our hardware, and choose your own materials and lengths.

Custom Metal
Alongside our standard metals we have a range of custom finish options including Rose Gold, Vintage Copper and Silver Plate.

Tailored
If you are not able to find something to suit your project in either of our catalogue ranges or via the Modify process we will be happy to discuss developing and manufacturing your vision from start to finish.

We have the capabilities and know-how to manufacture most types of door hardware, however complex, and have been the manufacturer of choice for some of the most prestigious and demanding clients in the world, including a number of Superyacht builders.

We understand the demands put on door and cabinet hardware and will ensure that your design not only looks a million dollars but it is also built to last and function smoothly.

In the first instance please contact our custom design department at our head office and ask for Alex Foster on +44 (0)1271 325 325 or email alex@turnstiledesigns.com. Alex will discuss the project, designs and suitability (to develop time scales and budget indications) from prototyping to full delivery.
