finishes

Living finishes

Living finishes are designed to change with time and use. Brass components are polished and then treated in a number of different ways to change the surface, either by accelerated aging or with the Vintage and Burnished finishes or brushing as with our Satin Brass.

Brass living finishes can be used outdoors, but will be subject to the specific atmosphere of the location and change accordingly.

Brass Living

For our hardened finishes, we use a more gentle technique to patina, each piece is hand brushed to break the surface before being patinated, then subtly distressed, hand polished and waxed to give a luxurious antique finish, highlighting every hammer blow perfectly.

Hammered Living

Polished Brass (PU)
Solid brass, expertly polished, then hammered and polished a second time to a high shine, with subtle light reflection. Either allows the natural aging process or keep polished with any brass/copper cleaning products.

Bright Chrome (BC)
Solid brass, expertly polished then individually hammered, before polished with a bright chrome plating.

Hammered Plated

Polished Nickel (PN)
As with Chrome, solid brass, polished, hammered and re-polished before being finished with our beautifully subtle nickel plating. Superb in contemporary or traditional interiors. Clean with any quality nickel polish.

Burnished Nickel (NH)
Polished solid brass, individually hammered, then nickel plated before being hand burnished, patinated and distressed to be finished with a wax finish. Eight pairs of hands before assembly, QA and packaging.

Satin Nickel (SN)
Solid brass, polished, individually hammered a thousand times, and finished with a fantastic, flat satin nickel plating, no brushwork. A superbly versatile fresh that will stand the test of time.

Code: LV - living finish. INT - interior use only. EXT - interior or exterior use. PL - plated finish.

Hammered finishes

Cocoa (CO)
David McClure composite, plain designs reminiscent of mid-century Bakelite.

Black Bronze (BB)
Dyed matte-mixed with raw bronze, highly polished to bring out the bronze highlights, a rich black that will go well in any interior.

Silver Bronze (SB)
Heavily oxidised solid red bronze, highly polished and waxed to produce a rich dark golden finish.

Attache Cognac (AC)
A colour match to our Chestnut Leather. Available only on flush products such as sliding door hardware, to avoid marking.

Finesse Black (FB)
A colour match to our Black Leather. Available only on flush products such as sliding door hardware, to avoid marking.

Destiny Storm (TS)
A colour match to our Slate Grey Leather. Available only on flush products such as sliding door hardware, to avoid marking.

Leather

Attache Cognac (AC)
A colour match to our Chestnut Leather. Available only on flush products such as sliding door hardware, to avoid marking.

Finesse Black (FB)
A colour match to our Black Leather. Available only on flush products such as sliding door hardware, to avoid marking.

Destiny Storm (TS)
A colour match to our Slate Grey Leather. Available only on flush products such as sliding door hardware, to avoid marking.

Leather

Chestnut (CN)
A gorgeous, reddish-brown, full of life and finished with a natural, off-white thread.

Chocolate (CT)
A rich dark brown, our most popular finish, classic leather, finished with a dark brown thread.

Tan (TA)
Light, luxurious leather, edged with a soft, natural thread.

White (TW)
White leather, white thread, white edging for a clean and contemporary look.

Woven Leather

Tobacco (TC)
A reddish-brown mix of woven strands to produce our breed setting.

Whisky (WK)
A light tan mix with dark edging.

Raven Black (RV)
The bold, beautiful reflective black sheen, that comes alive as light catches it.

Flint Grey (FG)
A reddish brown mix of woven strands to produce our breed setting.

Attache Cognac (AC)
A colour match to our Chestnut Leather. Available only on flush products such as sliding door hardware, to avoid marking.

Finesse Black (FB)
A colour match to our Black Leather. Available only on flush products such as sliding door hardware, to avoid marking.

Destiny Storm (TS)
A colour match to our Slate Grey Leather. Available only on flush products such as sliding door hardware, to avoid marking.

Amalfine™

Warm to the touch, tactile and incredibly detailed our Amalfine™ finishes are also extremely durable and maintenance free. Each design and pattern translates differently according to the finish, please see our website to view all designs in all finishes. Please note Amalfine™ designs are recommended for interior use only.

Shown here – Wire Cabinet Handles

Amalfine™ is a composite blend which has become one of our trademarks and is entirely unique to Turnstyle. Incredibly versatile and durable, each piece is hand cast, finished and will pass through at least eight pairs of hands before finally being packed for dispatch. Every piece is unique with its own individually crafted character and charm.

The finishes in the Amalfine™ range are more like materials than finishes, the colour runs throughout the design so unlike a surface finish it cannot wear off.

Using highly flexible silicone rubber moulds we are able to reproduce finger print detail from the masters we cast from and de-mould the parts without a seam.

After de-moulding, each design is carefully machined down to remove excess material and where applicable to accurately fit its brass partner.

After around six to eight hours of various polishing stages the beautiful lustre will remain for many years to come.

Every piece is unique with its own individually crafted character and charm.

Turnstyle also offer a Custom Casting and finishing service. For better understanding of the process visit our website and view the production movies www.turnstyledesigns.com
These luxury flush push button cabinet knobs are perfect for super yachts or as an original, elegant way to finish your cabinets. For further information visit our website or call our sales team. Precision engineered out of solid brass and designed to work with our lux push button latch. The come in Amalfine, Leather and Solid and our fully suited product ranges.

Shown here in a variety of designs and material finishes with polished nickel.

Precision engineered from solid brass to work with our lux push button latch, or more cost effective versions. These luxury push button knobs sit flat and flush when locked then push to release. Shown here in Polished Nickel.

Turnstyle uses a host of manufacturing processes to produce the very best result for each design and product. These include CNC machining, turning, milling, forging, investment casting and extrusion. All carried out by highly skilled precision engineers.

A selection of our Solid designs are available with our hammered texture applied. Every design is individually hammered with up to a thousand hammer blows per grip, each handle is made to order and completely unique. Whatever finish you wish to apply, our Hammered range is a luxurious option and versatile enough to work in any interior.
latching handles

More options for latching handles. Simple, ingenious ways of keeping your cabinets secure, lift the leather handle to release the catch and pull open or push the button to open. Not just for yachts, they are a better way to keep cupboards shut, smarter than magnetic or friction catches.

Shown here in Chestnut Leather and Bright Chrome.

MATT NICKEL

ONL Y
Leather manufacturing

Our leather is sourced from some of the finest tanneries in the world in Tuscany, Italy. We use only the very best full grained (top and strongest section), vegetable tanned (all natural), drum dyed, bridle or saddle leather.

Leather like all natural materials will change with age, according to the situation, exposure to sunlight and usage or lack of. The more you use it, the better it looks, the oils from your hands feed the leather and create a unique patina. Like an old handbag or briefcase the character of the leather gets richer with age.

Colour Variation

Vegetable tanning is an art rather than a science, please allow for some variations in colour from batch to batch and even from hide to hide in some cases. This is all part of the charm of using such a beautiful and natural material.

Wear and Care

As with a good handbag or pair of shoes the leather will appreciate being fed from time to time, we recommend twice a year with a good quality leather cream, or we can supply a recommended cream if you wish.

Do not clean with solvents or chemicals, as this will not only affect the leather but also soak through and destroy the glue. Scratches and dents can be removed by a simple “boning” process that brings the oils back to the surface and repairs by simply working the leather area in circular motions with a boning tool (or the back of a spoon).

If the leather gets dirty use a small amount of soapy water, let it dry and finish with a natural wax. Try and remove dust if the handles are not being used, as dust dries out the leather.

With a small amount of care your handles will last for years and years to come.
flush hardware and locks

Our flush fitted handles range has been growing every year, by popular demand and is now available in all sorts of shapes and sizes. Machined from solid brass with hidden fixings and available with our faux leather inlays to prevent scratching and marking. Shown here in a Raven Black Faux Leather with Satin Nickel

We are proud to have one of the most progressive websites in our industry, with a simple to use configuration tool which allows you to view every one of our designs in every combination of grip and body, leather, Amalfine™ and brass.

Choose your design, finish and size, download the specification sheet and then request your pricing. Our sales team will then send you a quote and tell you how to buy.

You can also keep up to date on our latest news, developments, events and dealerships, as well as read our blog where you will find interesting posts about what we are up to as a business and team.

www.turnstyledesigns.com
customisation

Modify
We offer modification and customisation options for clients by using existing stock components.

A cost effective way to enable a client to have a unique, bespoke design by using some of Turnstyles’ stocked components and modifying material, grips or finish and thereby benefiting from both price and delivery times.

There are several ways of achieving this... here are the main areas:

Custom Leather
Clients can free issue their leather to apply to an existing design or modify our stitch colour or style.

Custom Grip
Create your own grip for any of our hardware, and choose your own materials and lengths.

Custom Metal
Alongside our standard metals we have a range of custom finish options including Rose Gold, Vintage Copper and Silver Plate.

Tailored
If you are not able to find something to suit your project in either of our catalogue ranges or via the Modify process we will be happy to discuss developing and manufacturing your vision from start to finish.

We have the capabilities and know-how to manufacture most types of door hardware, however complex, and have been the manufacturer of choice for some of the most prestigious and demanding clients in the world, including a number of Superyacht builders.

We understand the demands put on door and cabinet hardware and will ensure that your design not only looks a million dollars but it is also built to last and function smoothly.

In the first instance please contact our custom design department at our head office and ask for Alex Foster on +44 (0)1271 325 325 or email alex@turnstyledesigns.com. Alex will discuss the project, designs and suitability (to develop time scales and budget indications) from prototyping to full delivery.
The majority of our designs are fully suited to co-ordinate across entire project specifications. From start to finish you can mix and match your chosen designs to fit any project.
For a compete look to any interior, make sure you take a look at our Door and Furniture Hardware Brochures. Where you will find many more of our products and collections to suit any design style.
