**Our Satin Brass Waxed finish is luxurious and regal,
perfect for interior applications.**

With our process, the brass is hand polished by our skilled team and then wire brushed. This gives it a warm gold textured finish, which after being carefully coated with wax, the process is complete. The brass has a matte like look to it, but with a hint of shine.

This living finish, like all brass products, will darken with age intensifying the look. It can however, be easily polished to maintain its golden glow. It looks particularly good when placed alongside our Amalfine™ and leather materials, creating a bold contrast.
