

PLINTH RANGE

The Plinth range was designed to evoke strong monolithic shapes. Drawing inspiration from powerful, blocky architecture such as the work of architect Denys Lasdun and The Beinecke Rare Book Library at Yale University.

The strong, clean base The Plinth provides is the perfect frame for two new original Amalfine™ textures.

Mosaic – designed to give the feeling of ancient, tiled floors as a contrast to the modern, hard Lined silhouette of the Plinth. Each master is handmade, embracing the imperfections as part of the design. This texture is also available in Turnstyle's unique Sand finish.

Diamond – a bold contrasting texture that draws inspiration from modern architecture like the work of Coll-Barreu.

The Plinth is a new full range for Turnstyle, complete with door levers, pulls and cabinet handles. Available in hand stitched, Italian saddle leather, solid and hand-hammered brass and two new Amalfine textures. With 240 potential finish combinations across all 5 products, The Plinth is the perfect opportunity to make a statement.
