

TILT & TURN HANDLES

Tilt and Turn windows are unique in that they function in two ways. The Tilt function (handle at 3 or 9 o'clock) opens the top of the sash, allowing ventilation. The Turn function (handle at 12 o'clock) allows for the window to be opened inwardly, hinging from the side. A ratchet mechanism locates the handle in the Closed, Tilt and Open positions.

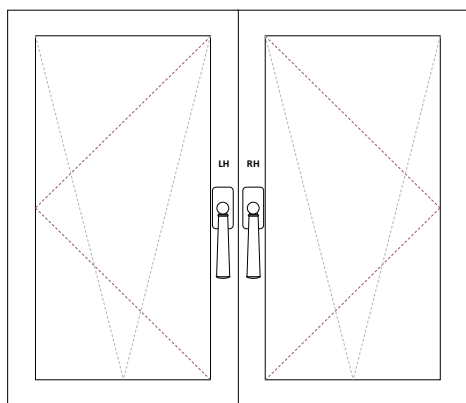

Supplied with :

2 of M5 x 30mm c/sunk bolts
